Faith and Amy,

Please see below for comments on the Section 4(f) Chapter. Please contact me if you have any questions. Also, please attached an email from Elaine at the NPS regarding NHL language for the Pearl Harbor landmark.

Liz

Page 5-6

In the paragraph on school playgrounds not being Section 4(f) properties, remove the sentence "Notwithstanding, recreational resources from these non-Section 4(f) properties are not directly used by the Project."

Page 5-20

Missed a comma removal from Chris last set of comments submitted last week.

Page 5-22

The language responds to Chris's comment. However, the Section 4.10 does not actually mention the Memorial. It would be a land use category 3. Because it is immediately adjacent to the Ke'ehi Lagoon Beach Park (also a Category 3), I recommend either adding language in the section 4(f) chapter to explain that the noise analysis for the Lagoon Beach Park would also apply to the memorial or changing Figure 4-55 on page 4-123 to include the memorial. Therefore change the table for Ke'ehi Lagoon Beach Park to also include the Ke'ehi Lagoon Memorial.

Page 5-40

First paragraph underneath the map or photograph has conflicting language about whether there would be a use to the contributing element to the historic district.

Page 5-54

Edit not made and sentence still unclear with the edit. "Eligibility for the National Register.... even if severe, substantially impairs these features and attributes."

Page 5-58

Need to make more edits to include more of the NPS 1978 nomination boundary. My comment includes suggested language.

Page 5-68

Comment not addressed on whether activities will be substantially impaired under summary evaluation of constructive use of 4(f) properties.
